

DELKO *tools*

Quality drywall tools made for the trade... by a Drywall Professional

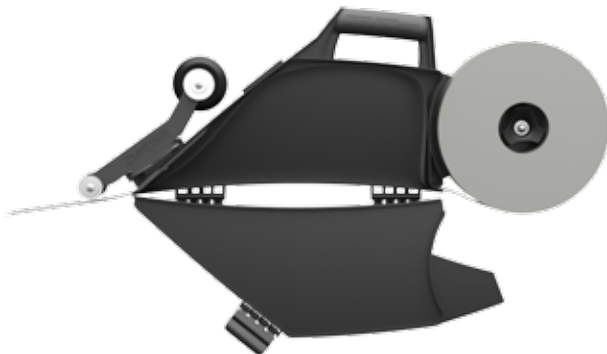

ZÜNDER

The Zünder has been meticulously designed to revolutionise the taping process. Zünder features the double ended Delko applicator which allows for simultaneous application of compound and joint tape on flat joints, internal corners and square set in minutes – eliminating messy and time consuming adjustments.

“ From day 1 this banjo performed awesome.
The Zünder is the Cadillac of banjos. ”

DELKO

PLASTIC TAPING TOOL PACKAGE

This is where it all began... with a simple idea that would change the taping process. The Delko Plastic Taping Tool Package includes both a Delko plastic taper and the original, patented, internal applicator attachment. These two tools enable contractors to finish flat joints, internal corners and square set with one tool.

“5 Stars.
Makes taping a
lot faster good
product.”

Dale D - Drywall
Professional U.S.A

- Simultaneously applies compound and joint tape to flat joints and internal corners
- The attachment applies pre-coated paper tape to the internals, rolls and embeds the tape, all in one quick action, at a perfect 90° angle
- Fast, easy and affordable flat joint and internal finishing
- 2 high quality mud control dials included in the package
- Tool weight (empty): 0.80kgs*
- Compound Capacity: 2.25kgs*

“ Drywall is a specific trade that deserves more attention to evolve. Having a personal passion for the industry I want Delko Tools to play a part in helping my trade progress. The drywall/plastering trade is arguably the hardest physical and technical trade. I'd like to see greater resources for drywall as there is for other trades. ”

Dan from Delko Tools

Delko Tools was founded in 2009 with the vision of providing reasonably priced drywall tools to the industry while also solving some long standing frustrations.

It all started with the internal applicator attachment released in 2009 for online sales. The idea behind the internal applicator attachment was a simple one. The owner and General Manager of Delko Tools wanted to get more out of his beloved Plastic Taper - it runs tape in so well on flat joints, why can't it do the same for internal corners?

From there Delko Tools has grown to become the premier developer of banjo tapers in Australia, with a growing reputation across the globe. Drywallers and plasterers everywhere have an appreciation for simple and well made plastering solutions that make their job easier at a fraction of the price.

What's next for Delko? The team at Delko are committed to producing more time and labour saving drywall tools at prices that make them accessible for tradespeople across the globe.
